- **GRAPHIC DESIGNER**
- **WEB DEVELOPER**
- **IT SUPPORT & COMPUTER REPAIR**
- **DATA ANALYTICS**
- **CREATIVE AND TECH-SAVVY PROFESSIONAL**

EXPERIENCE

CNC PLASMA OPERATOR
G & R | 2017 -2018

- I operated CNC plasma cutting machines to produce metal parts based on technical designs. I used AutoCAD and SketchUp to work with designs, checked machine performance, and made adjustments to ensure accurate results. I also maintained a safe and organized workplace.

GRAPHIC DESIGNER, SITIO AFFAIRS OFFICE, COMPUTER TECHNICIAN
Barangay Lapasan | 2020 -2023

- I worked as a graphic designer, computer technician, and data entry staff. I recorded voter information, organized community records, and helped identify residents who needed financial aid or medical support. I also assisted in community projects and provided computer support.

GRAPHIC DESIGNER
Cyberbee Advertising | 2023 -2024

- I created custom tarpaulin designs for birthdays and special events. I also designed T-shirt graphics for sublimation printing and mug designs. I handled both the design and printing tasks to ensure quality and customer satisfaction.

AMAZON ARBITRAGE | AMAZON PRIVATE LABEL
Matt 633 Inc. | 2024-2025

- I was responsible for researching unique and trending products on Alibaba by checking their views, customer feedback, and potential return on investment (ROI). I evaluated product prices based on the client's budget and requirements, searched for affordable and reliable suppliers, and prepared product case studies and reports using Canva. I also created AI-generated video advertisements for TikTok and other social media platforms to help promote the products, while the client handled the final Amazon product listing.

DATA ANNOTATION | ROBOTOICS
Remotask. | 2025-2026

- I reviewed videos of people performing daily tasks and labeled robot movements, hand actions, and objects. I described each step, such as picking up, moving, folding, and placing items. I also checked and corrected the labels to ensure accuracy and consistency. This work helps train AI robots to understand and perform human actions.
